

NEHA BENDALE

Product Manager 2 | 6 YOE | Payments & FinTech Platforms | AI-Native Finance

Bangalore, India | +91-9075095998 | nehabendale308@gmail.com | [in](#) LinkedIn | [globe](#) Portfolio

SUMMARY

Product Manager with **6 years** building scalable fintech and platform products across **payments, lending, checkout, and enterprise ecosystems**. Experienced in identifying product opportunities, driving platform strategy, and improving customer and business outcomes across high-scale regulated systems serving **90M+ users**. Currently building **AI-native** financial products focused on intelligent portfolio experiences and agent-driven insights in private beta.

EXPERIENCE

Bajaj Finserv, Jul 2020 – Present

Partner Platform & Enterprise Modernization

Mar 2024 – Present

- Identified partner onboarding friction from fragmented compliance workflows; prioritized a reusable B2B2C platform over bespoke per-partner integrations, **5% revenue uplift** with **zero regulatory escalations**.
- Standardized partner onboarding through reusable APIs and KYC automation, cut time by **40%** and engineering effort by **60%**.
- Identified discoverability gaps across **40+ siloed apps** for **100K+ employees**; drove the decision to consolidate platforms despite cross-BU resistance, improved service reliability by **25%** and cut support volume.

Device Financing: 0-to-1 Product

Feb 2023 – Feb 2024

- Identified credit-score-based rejection excluding customers with strong repayment intent; defined a behavioral segmentation model to price risk differently for underserved customers, reducing defaults by **60%**.
- Identified fragmented data cross-referencing as root cause of delayed borrower resolution; defined a unified KPI framework for **300+ operations users**, cut investigation effort by **40%** and escalations by **45%**.

Payments Platform and Checkout Optimization

Sep 2021 – Jan 2023

- Challenged issuer-first attribution of auth failures; diagnosed PG volume caps, UPI intent failures, and issuer declines across **90M+ users**, chose routing optimization over escalation; improved authorization by **25%** across **10Cr+ transactions**.
- Identified static collection schedules with no behavioural signal as a driver of delinquency; redefined collections strategy around adaptive nudges and NPCI/BBPS reporting; **25% collections efficiency improvement** and **35% NPS lift**.

Loan Servicing Platform

Jul 2020 – Aug 2021

- Transitioned from software engineering into product while building high-scale loan servicing systems; identified deployment bottlenecks and drove CI/CD adoption on Azure DevOps, reducing **deployment cycle time by 30%** with zero-downtime releases. Technical depth continues to influence platform strategy, engineering tradeoffs, and cross-functional execution planning.

AI-NATIVE BUILDS

AI-Powered Personal Wealth Platform

NEESH

- Identified fragmented portfolio tracking as an unmet need for retail investors; defined product strategy for a wealth platform integrating brokerage APIs; validating **automated trade ingestion, portfolio monitoring, and deviation alerts** through an invite-only beta.
- Prioritized **LLM-based agentic workflows** for portfolio categorization and proactive alerts; targeting a **50%+** reduction in manual analysis time for retail investors across asset classes.

Self-hosted Secure Family Vault

NEESH-SECRETS

- Identified unsafe credential storage in plaintext and messaging apps; chose a **zero-knowledge architecture** AES-256-GCM vault with a two-key inheritance gate; **server compromise exposes nothing readable**.

SKILLS

Product Management: Product Strategy & Roadmapping, OKRs/KPIs, Customer Discovery, Prioritization, A/B Testing, North Star Metrics

Payments & FinTech: PG Integration, Checkout Optimization, Authorization & Settlement, UPI, BBPS, Lending Platforms, KYC

Technical: REST APIs, SQL, Data Analytics, System Design, Mixpanel, Azure DevOps, API Integrations

AI & Emerging Tech: Generative AI, Agentic AI, LLM Applications, AI Product Workflows, AI-Assisted Development

Compliance & Risk: RBI Guidelines, Audit Trail Design, Risk Controls, Compliance Workflows

EDUCATION & ACHIEVEMENTS

B.Tech: Electronics and Telecommunications, College of Engineering Pune (COEP)

Certifications: Google Cloud Generative AI Learning Path | IBM AI Product Management

Awards: A+ rating for 3 years; **10+ awards** from MD and CTO. Overseas Incentive Award for exceeding targets by **60%**.
